RE: Interview scheduled Friday, October 10th at 10:30 a.m. Central time

Draft of Proposed Amendment for Discussion Purposes:

10. (currently amended) A process for removing fluorine-containing emulsifier from an aqueous fluoropolymer dispersion which comprises adding to the dispersion an effective amount of a nonionic emulsifier to stabilize the dispersion, contacting the stabilized dispersion with an effective amount of an anion exchange resin to essentially remove fluorine-containing emulsifier from the stabilized dispersion and separating the dispersion from the anion exchange resin, wherein the separated dispersion is essentially free of fluorine-containing emulsifier, and optionally, subjecting the so-obtained dispersion to upconcentration.
